PROFESSIONAL SUMMARY

SEO Executive and Digital Marketer with a Master of Computer Applications (MCA) and a strong technical foundation in web development. Skilled in On-Page SEO, Technical SEO, Core Web Vitals optimization, and Social Media Marketing (SMM). Experienced in driving organic growth and managing e-commerce visibility across Amazon, Flipkart, and Meesho. Adept at translating technical audits into traffic-generating strategies that improve SERP rankings and user experience (UX).

CORE COMPETENCIES & SKILLS

SEO & Digital Marketing: On-Page SEO, Off-Page SEO, Technical SEO, Keyword Research, Competitor Analysis, SERP Analysis, Social Media Marketing (SMM), E-Commerce Marketplace Optimization

Marketplace Platforms: Amazon, Flipkart, Meesho — Catalog optimization, keyword-rich listing creation, A+ Content, competitor pricing analysis

SEO Tools: Google Search Console, Google Analytics (GA4), Google Keyword Planner, SEMrush, Ubersuggest, Screaming Frog, PageSpeed Insights

CMS & Performance: WordPress (Website Creation, Theme Customization, Plugin Management, WooCommerce, Yoast/RankMath SEO, WP Rocket, Content Management), Core Web Vitals, Page Speed Optimization, Schema Markup

Technical Skills: HTML5, CSS3, JavaScript (ES6+), React, Python, PHP, MySQL, Git — applied to support technical SEO and site performance improvements

Languages: English, Hindi, Gujarati

PROJECTS & PRACTICAL EXPERIENCE

SEO & SMM Strategist | *E-Commerce Marketplace Project (Amazon, Flipkart, Meesho)* | 2025

- Managed product catalog optimization across Amazon, Flipkart, and Meesho — crafting keyword-rich titles, bullet points, and descriptions that improved internal marketplace search rankings.
- Developed and executed Social Media Marketing (SMM) campaigns to drive external traffic to marketplace listings and proprietary storefronts, resulting in an estimated 25% increase in listing visibility.
- Conducted competitor analysis on pricing, reviews, and promotional strategies, adjusting keyword and visibility tactics to improve conversion rates.
- Tracked performance metrics using Google Analytics (GA4) and platform-native dashboards to continuously optimize listing content and ad spend.

Full-Stack Developer (BCA Final Year Project) | *ElectroMart – E-Commerce Website (Electronics)* | 2023 – 2024 (BCA Final Year)

- Developed a full-stack e-commerce web application using Python, PHP, React, and MySQL — featuring product listing, cart management, user authentication, and order tracking.
- Designed and implemented a relational MySQL database schema to manage product catalog, inventory, users, and orders efficiently across the platform.
- Built a responsive React frontend with dynamic product filtering, search functionality, and a smooth checkout flow — ensuring a consistent UI across desktop and mobile devices.
- Integrated a PHP-based REST API backend to handle product data, user sessions, and order processing — applying MVC architecture principles for clean, maintainable code.
- Applied Git version control throughout development and deployed the application in a local server environment — demonstrating understanding of full software development lifecycle.

Frontend Developer (React JS) – Internship | *FNF – Cleaning Service Web Application* | 2025

- Developed the frontend of a service-based cleaning booking platform using React JS — building reusable UI components for service listing, booking forms, and user dashboards.
- Implemented React Router for multi-page navigation and managed application state using React Hooks (useState, useEffect) — ensuring a smooth and responsive single-page application experience.

- Built fully responsive layouts using CSS3 and HTML5 — ensuring the application rendered correctly across all screen sizes and devices, following mobile-first design principles.
- Collaborated with the backend team during the internship — integrating REST APIs into the React frontend for real-time booking data, user authentication flows, and service management features.

WordPress Website Developer & Content Manager | *WordPress Website Projects (Multiple Clients / Personal)* | 2025

- Designed, developed, and managed full WordPress websites from scratch — including theme selection and customization, plugin configuration (Yoast SEO, WooCommerce, Contact Form 7, WP Rocket), and ongoing content updates.
- Performed complete on-page SEO for WordPress sites — optimizing meta titles, descriptions, heading hierarchy (H1–H3), image alt tags, and internal linking structure, leading to an estimated 40% improvement in organic search visibility within 3 months.
- Wrote and published SEO-optimized blog content and landing page copy — conducting keyword research via Google Keyword Planner and Ubersuggest, and structuring content for featured snippet eligibility and readability.
- Improved Core Web Vitals scores on WordPress sites by implementing caching (WP Rocket / W3 Total Cache), image compression (Smush), and CDN integration — achieving measurable improvements in LCP and CLS metrics as verified via Google PageSpeed Insights.
- Managed website security, plugin updates, regular backups, and uptime monitoring — ensuring 99%+ availability and a smooth, secure user experience across all managed sites.

EDUCATION

Master of Computer Applications (MCA) | Gujarat Technological University (R. B. Institute of Management Studies) | 2026 (Expected)

Bachelor of Computer Applications (BCA) | Gujarat University (President Institute of Computer Application) | 2024
